## Introduction

Welcome to **JoshBot**, an advanced virtual assistant that can help you with various tasks, provide information, and engage in conversations. This chatbot is built using [Streamlit](#) and leverages web scraping techniques to retrieve relevant information from the web.

 Chatbot Screenshot

## Features

- Natural language interaction with users.
- Seamless integration with web scraping and data retrieval.
- Real-time chat history tracking.

## Installation

1. Clone the repository:

```
git clone https://github.com/NyamasegeJoshua/WebCrawler-Bot.git  
cd your-chatbot-repo
```

2. Install the required dependencies: `pip install -r requirements.txt`

## Usage

1. Run the chatbot app: `streamlit run stream.py`
2. Interact with the chatbot in your web browser. Enter your queries and receive responses.

## Contributing

Contributions are welcome! If you find any issues or want to enhance the chatbot's capabilities, feel free to create a pull request or open an issue.

## License

This project is licensed under the MIT License.
